DESKLESS BUSINESS MODEL CANVAS

INSPECTION REPORTS, WITHOUT THE DESK.

TEAM TECHAZSURE

KEY PARTNERS

iQOO and vivo (Office Kit, device showcase)
Google (Gemma models, LiteRT-LM, Nearby Connections, Play services)
The sherpa-onnx open-source community (Whisper on the phone)
Facility-management companies as resellers
Hospital, college and housing-society associations
Hosting providers for self-hosted servers

KEY ACTIVITIES

Building the app and server
measuring the on-phone models with the scorecard
running pilots in a hospital, a college and a housing society
onboarding organisations and their roles
adding report types and languages
supporting self-hosted deployments

KEY RESOURCES

One code base for the staff and user editions of the app and for the server
open-source models under permissive licences (Whisper, Gemma)
the team's engineering
each organisation's own issue history, kept under its control
Docker and GitHub Actions for one-command delivery

VALUE PROPOSITIONS

A finished, structured, signed report from a walk, spoken in your own language, with no network
the photo checked against the note every issue ranked and routed to the right person with reasons
the people who use the place can report and hear back
privacy by construction, nothing uploaded to make a report
no per-report AI cost

CUSTOMER RELATIONSHIPS

Self-serve sign-up with approval by the level above
the managing director invites a team with an eight character code
an in-app assistant that asks back and talks
pilots with a named contact
email support
the public reports without an account manager in between

CHANNELS

The DeskLess app (direct APK today, Play Store next)
the DeskLess User edition for the public
web consoles for every role
facility-management companies and system integrators as resellers
direct sales to institutions
the iQOO showcase and the public GitHub repository

CUSTOMER SEGMENTS

Hospitals and clinics
colleges and universities
government and company offices
housing societies and apartment managers
malls and retail chains
factories, warehouses and hotels
construction and facility-management firms
and, as free users, the residents, students, patients and visitors of those places

COST STRUCTURE

Engineering salaries
A small server per organisation or a shared one (stateless FastAPI and PostgreSQL)
Email delivery
Play Store and signing fees
Sales, pilots and onboarding
Optional server-side writing model
Zero per-report inference cost: the AI runs on the phone

REVENUE STREAMS

Free for small teams
A per-place monthly subscription for consoles, assistant, report types and the public door
A self-hosted enterprise licence with annual support
Onboarding and training as a one-time service
The on-phone AI stays free

REVENUE MODEL

TEAM

FREE

- Up to 5 staff and one place
- The full on-phone app
- Signed PDF reports
- Phone-to-phone relay
- Office Kit hand-off
- Reports stay on the phones

ORGANISATION

INDICATIVE

INR 4,999

PER PLACE PER MONTH

- Consoles for every role
- The assistant that ranks, routes and chases
- The public door for users of the place
- A company's own report types
- Email
- The live linkage
- Hosted by DeskLess

ENTERPRISE

ANNUAL LICENCE PLUS SUPPORT

PRICED PER ORGANISATION

- Self-hosted with one setup script
- Under the organisation's own domain
- Its data stays on its own server
- Custom report types and languages
- A named engineer

WHY THE MARGIN HOLDS

The expensive part, AI inference, runs on phones the organisation already owns; the server only stores, ranks and routes, so hosting cost per place is a few hundred rupees a month.

ADD-ONS

- Onboarding and training as a one-time service
- Integrations with existing maintenance and ERP systems

GO-TO-MARKET AND UNIT ECONOMICS

STEP 1

PILOTS

one hospital, one college,
one housing society,
each for 90 days, free,
in exchange for measured
results and a reference

STEP 2

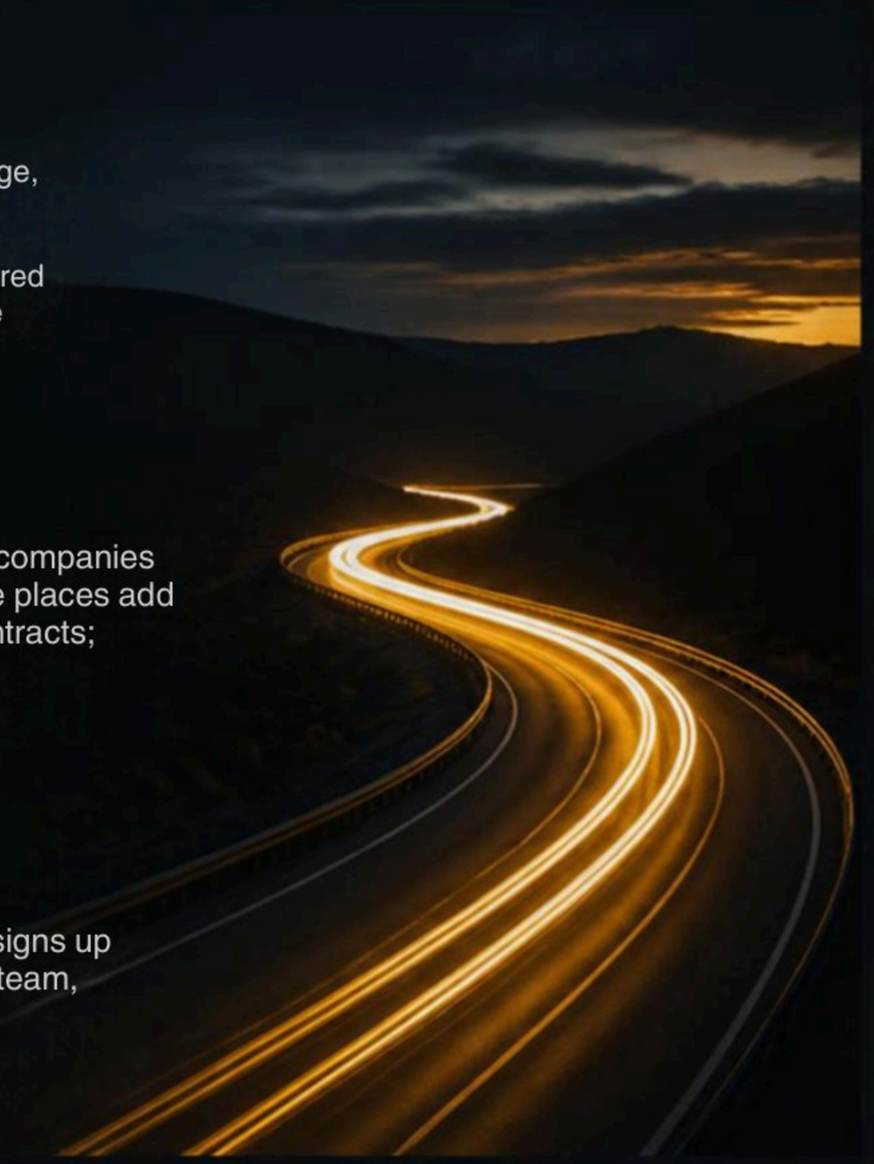

RESELLERS

facility-management companies
that already run these places add
DeskLess to their contracts;
they bring the places,
we bring the product

STEP 3

SELF-SERVE

a managing director signs up
on the web, invites a team,
and the first report
arrives the same day

UNIT ECONOMICS PER PLACE

subscription indicative INR 4,999 a month

hosting and email a few hundred rupees

onboarding once

no per-report AI cost

gross margin above 80 percent at scale

WHAT A PLACE SAVES

the hour at the desk after every walk
the issues that were never written down
repairs that start days late

DEFENSIBILITY

the evidence guard, the sealed relay and
the sensor stamps are engineered into the product;
the organisation's own issue history grows
more useful every month
