DL DeskLess

INSPECTION REPORTS,
WITHOUT THE DESK

SPOT IT.
SAY IT.
IT GETS FIXED.

DeskLess turns a photo and a spoken sentence into a finished report, on the phone itself, with no network. Then it carries it to the person who has to fix it, and tells you when it is done.

APARTMENTS ◆ COLLEGES ◆ HOSPITALS ◆ OFFICES ◆ MALLS ◆ FACTORIES ◆ WAREHOUSES ◆ HOTELS ◆ CONSTRUCTION

THE PROBLEM

EVERYONE SEES IT. NOBODY REPORTS IT.

India runs on shared places: housing societies, colleges, hospitals, offices, markets, factories. What goes wrong in them is seen by many people every day and reported by few, because reporting is slow, has to be typed, wants English, and nobody answers.

The stuck lift
Everybody walks past it. Each assumes someone else has already complained.

The register at the gate
Open in office hours, written by hand, read by nobody who can fix anything.

The group chat
The complaint sinks between forwards. No owner, no date, no proof.

The report typed at night
A day of walking becomes an evening of matching photos to notes from memory.

The basement with no signal
Plant rooms, wards and stairwells are exactly where cloud apps stop.

"It's done, sir"
No picture of the repair, and the person who reported it never hears.

TODAY	WITH DESKLESS
Find the register, the form or the right person	**Say it to your phone, where you are standing**
Type it, in English	**Speak it in Hindi, English or both; it is written down in English**
Hope somebody picks it up	**Ranked at once and given to a named person, with a date**
No signal, no app	**The AI is inside the phone, and phones pass reports to each other**
Take their word that it is fixed	**A photo of the repair, compared with the first one**
Never hear back	**Your phone tells you when it is closed**
Write the inspection report at night	**The report is built during the walk, signed and sent**

3 s
from a voice note to a filled report entry, on the iQOO 15

Under 3 s
to answer a question about the walk, on the phone's GPU

0
bars of signal needed to make a finished report

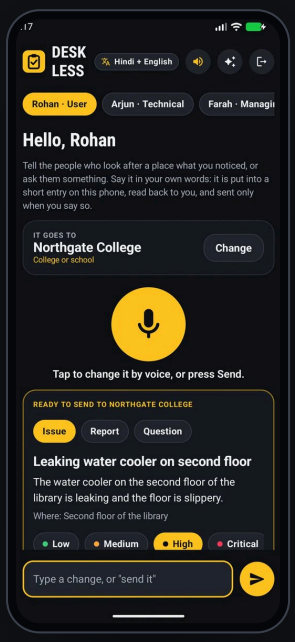

12
kinds of place built in, and you can add your own

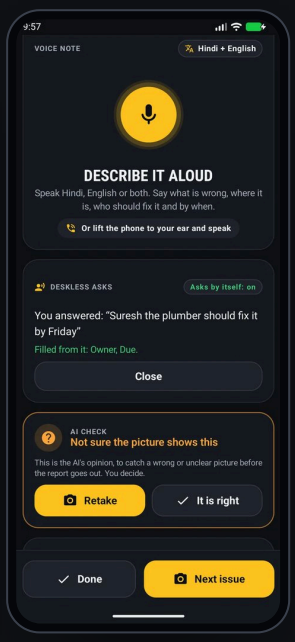

6
roles, from the one who reports to the one who closes

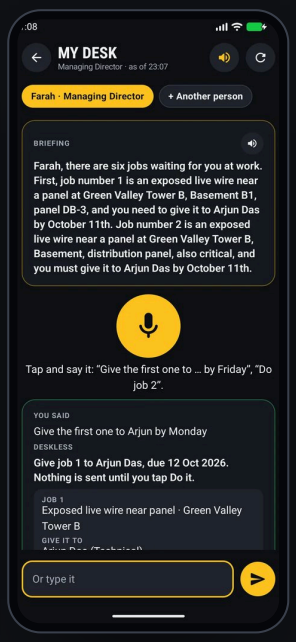

HOW IT WORKS

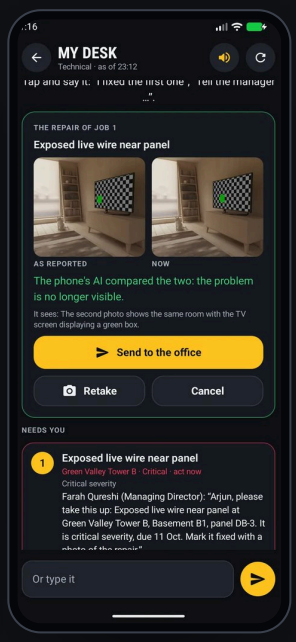

FROM A SENTENCE TO A REPAIR, IN FOUR STEPS.

Whoever notices starts it. Nobody has to type, and nobody has to chase.

1

SOMEONE SAYS IT

A resident, a student, a nurse, a guard: they tap the microphone and say what is wrong in their own words. An inspector on a round adds a picture or a short clip. The phone reads it back and waits for "send it".

2

THE PHONE WRITES IT

The speech becomes English text on the phone. The AI reads it with the picture and fills in what, where, how severe, who and by when. If something is missing it asks one question aloud. What nobody said is left out.

3

IT LANDS ON THE RIGHT DESK

The assistant ranks every issue and names who could take it. On My desk the phone reads the work aloud and the manager answers by voice: "Give the first one to Arjun by Monday." Nothing is done until it has been shown and confirmed.

4

FIXED, WITH PROOF

The technician photographs the repair. The phone compares it with the first picture, the manager closes the job, and the phone of the person who reported it says so.

AND WHEN THERE IS NO NETWORK AT ALL

Phone to phone, sealed

A report hops through nearby phones running DeskLess until it reaches the one it is for. The phones in between carry it and cannot read it, and a signed receipt comes back.

Walkie-talkie

Hold, speak, let go. The voice travels over the same sealed link to every linked phone within Bluetooth and Wi-Fi reach, or onward through a chain of DeskLess phones.

To the laptop, then the office

Save for Office Kit puts the report where iQOO Office Kit's file transfer picks it up. When the phone finds a network, everything goes to your own server by itself.

WHERE IT HELPS

ONE APP FOR EVERY KIND OF PLACE.

Choose what you are checking and the app changes its wording, what counts as serious and how issues are sorted. Twelve kinds come with it. The steps never change: say it, and it gets fixed.

Apartments and housing societies

Residents, security, the facility team

- Lift stuck between floors
- Water tank overflowing
- Parking lights out

Colleges and schools

Students, wardens, the estate office

- Exposed wiring in the lab
- Hostel water cooler leaking
- Broken bench in a classroom

Hospitals

Nurses, ward staff, maintenance

- Oxygen cylinder not chained
- Sharps bin overfilled
- Backup power failed its test

Government and company offices

Staff, visitors, the caretaker

- Token display dead at the counter
- Ramp blocked
- Damp in the records room

Malls and shops

Shop staff, housekeeping, the mall office

- Fire exit blocked by cartons
- Escalator handrail slipping
- Food court drain smelling

Factories

Operators, supervisors, safety officers

- Guard missing on a press
- Oil on the floor by the line
- Gas cylinder without its cap

Warehouses and depots

Pickers, forklift drivers, shift leads

- Bent racking upright
- Dock leveller stuck
- Lane blocked by pallets

Hotels and restaurants

Housekeeping, front desk, engineering

- AC leaking in a guest room
- Kitchen exhaust choked
- Torn carpet on the stairs

Construction sites

Site engineers, safety, contractors

- Crack in a beam
- Live wire by the panel
- No railing on the terrace edge

Pharmacies and ward stores

Pharmacists and auditors

- Expired stock on the shelf
- Fridge too warm
- Label missing from a pack

Neighbourhoods

Residents and the local office

- Streetlight out
- Drain overflowing
- Pothole at the junction

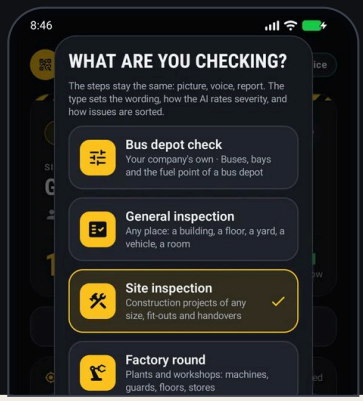

Anywhere else

A yard, a vehicle, a single room

- A general inspection fits any place
- It is what a new walk starts with

NOT ON THE LIST? MAKE YOUR OWN.

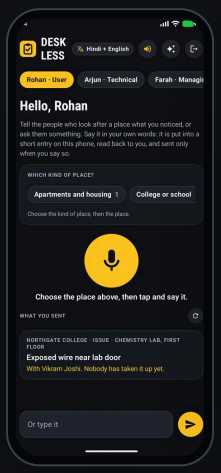

A managing director or manager makes a report type on the dashboard in a minute: its name, what the place is called, the kinds of issue, and what counts as serious there. Every phone of the organisation picks it up by itself, with no new version of the app.

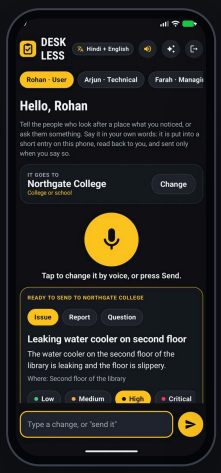

SEE IT WORKING.

FOR THE PEOPLE WHO USE THE PLACE

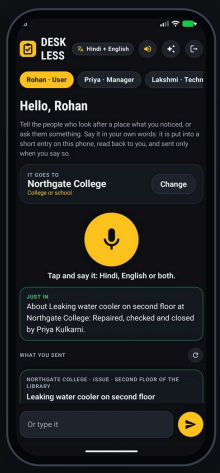

DeskLess User: a name, an email address and a code, then just say it. You hear back when it is closed.

Choose the place
Then tap and say it

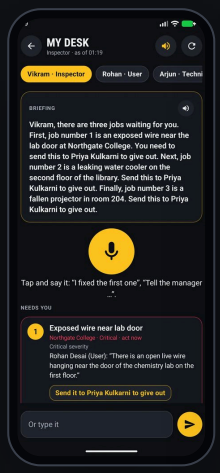

Read back
Change it by voice, or send

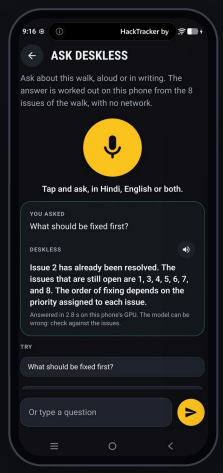

Just in
Repaired, checked, closed

FOR THE TEAM: MY DESK

The phone reads out what waits for you, and you answer by voice. One shared phone, several people.

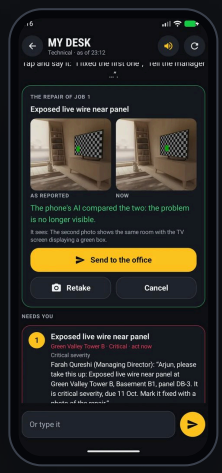

The briefing
Read aloud as it opens

IQOO 15

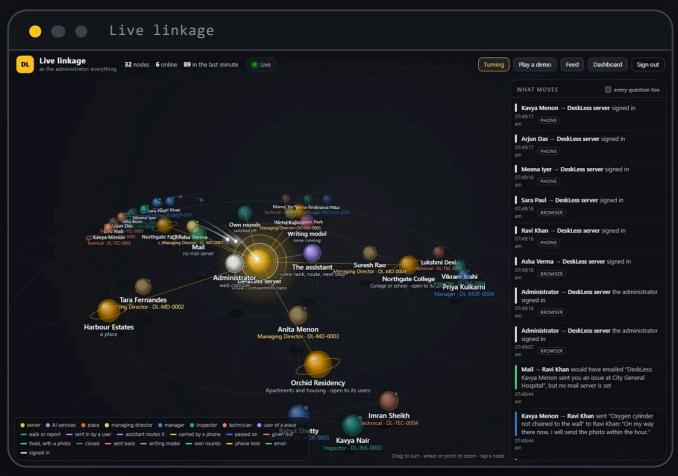

Ask the walk
Answered in 2.8 s

The repair
Two pictures, compared

A live console for every role
What needs you first, the assistant's ranking, who has room

Watch it run
The whole system in 3D: every report and repair a packet in flight

AND A REPORT SOMEBODY CAN ACT ON

- **A briefing at the top** and the three issues to do first
- **Every entry complete**: picture, severity, owner, due date
- **Signed with a fingerprint**; a changed copy shows
- **A map of the issues**, drawn with no network
- **Before and after** of each repair
- **A pack beside it**: spreadsheet, calendar, task lists

AI YOU CAN CHECK

THE MODEL WORDS IT. PLAIN CODE DECIDES.

A small model on a phone will sometimes be wrong. DeskLess is built so that being wrong does no damage.

Nothing made up

A name, a place or a date that nobody said is kept out of the report, and shown to you as kept out.

Shown before it is done

A spoken instruction becomes a list of changes on the screen. Nothing changes until you tap Do it.

An opinion, never a verdict

Every check the AI makes can be overruled by the person on the spot, and the report says so.

Yours, on your server

Speech becomes words on the phone. What is sent goes only to your organisation's own server.

UNDER THE HOOD

THE APP	Native Android, two editions from one code base
SPEECH	Whisper small, on the phone
WORDS AND PICTURE	Gemma 4 E2B on the phone's GPU, checked by plain code
PHONE TO PHONE	Sealed with ECDH P-256 and AES-256-GCM
THE SERVER	FastAPI and PostgreSQL, one command with Docker

START IN THREE STEPS

1. **Sign up**
   As managing director with your organisation's name; your team joins with your code.
2. **Pick your kind of place**
   One of twelve report types, or your own, made in a minute.
3. **Open the door**
   Let the people who use your place report from DeskLess User.

ALSO IN THE APP

- Ask it, or tell it, by voice
- The phone asks back
- A clip instead of a photo
- Level, noise and vibration readings
- NFC tags that name a place
- Position and a map of every walk
- Expiry dates read off the pack
- A review before a report leaves
- It learns your people and places
- An assistant that chases late work

READY WHEN YOU ARE.

Tell us about your place and we will answer with a price for it. Message us on WhatsApp: it takes one tap.
